

Ethan Holzer

Senior Product Designer | Denver, CO | (720) 331-1070 | eholzerred@gmail.com | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Senior Product Designer with 8+ years designing B2C mobile and web products, including 3 years in fintech. As design lead for Step's Growth pod, doubled identity verification (KYC) conversion and lifted first-time transaction conversion 50% by owning onboarding end to end, often stepping in as acting PM to scope initiatives and win executive buy-in. Specializes in growth design, A/B experimentation, and scalable design systems that help engineering ship faster.

CORE SKILLS

Product Design: End-to-End Product Design, Interaction Design, User Flows, Wireframing, High-Fidelity Prototyping, Mobile (iOS/Android) & Responsive Web, Accessibility

Growth & Strategy: Onboarding, Activation, Conversion Optimization, Retention, A/B Testing, Data-Informed Design, Product Strategy, Roadmapping

Design Systems: Component Libraries, Design Tokens, Multi-Theme Systems, Typography Systems

Research: User Interviews, Usability Testing, Contextual Inquiry, Surveys, Synthesis

Collaboration: Cross-Functional Leadership, Executive Stakeholder Alignment, Design Critique, Agile

Tools: Figma, Claude & Claude Code (AI-Assisted Prototyping), GitHub

EXPERIENCE

Independent Product Designer (Freelance) | 2025 – Present

Light Games (client engagement) – Product Designer, number puzzle app | 2025 – 2026

- Built a design system supporting 6 game modes with 6 fully tokenized, accessibility-focused color themes and 13 reusable components, keeping the app consistent and speeding up builds as new modes launched
- Designed a tokenized typography system that stays accessible and consistent across every game mode while giving each mode its own expressive character
- Led end-to-end UX in Figma, from user research through interaction flows, wireframes, and high-fidelity prototypes
- Used AI tools to accelerate prototyping and design-system work, shortening iteration cycles

GoodFail (self-directed product, in development) – Workout-tracking mobile app | 2026 – Present

- Shipped 17 iterative releases informed by 100 usability testing sessions, collecting tester feedback through GitHub Issues and mobile-browser builds
- Designed 15 end-to-end user flows that guide users toward progressive overload and controlled-failure training
- Created an intentionally lean, component-based design system to minimize engineering workload, enabling consistent UI implementation with Claude Code
- Used Claude AI-assisted prototyping and agents to generate interactive components and automate repetitive tasks, accelerating design iteration

Step – Senior Product Designer, Growth | 2022 – 2025

- Doubled identity verification (KYC) conversion within users' first 7 days by scoping a signup redesign as acting PM and securing C-level buy-in
- Increased first-time transaction conversion (MTU) 50% within users' first 7 days through a personalization strategy that asked users about their goals early in onboarding to build trust
- Increased KYC conversion 31% and MTU conversion 24% by building "Account Progress," a modular, component-based onboarding system within the Step Design System
- Reduced churn 23% and increased sponsorship conversion 19% by launching Daily Trivia, an engagement feature
- Led design for the Growth pod, partnering with product and engineering; used user interviews and product data to shape the roadmap
- Turned usability tests and surveys into A/B-validated improvements through interaction flows and high-fidelity Figma prototypes
- Upheld interaction standards across the Step Design System and flagged exceptions to leadership, improving consistency across releases

PointsBet Sportsbook – UX Designer | 2021 – 2022

- Made bet placement and funding flows 21% faster on average over 2 months by redesigning consumer betting and payments flows for web and mobile
- Reduced funding drop-off 26% by running usability tests on Figma prototypes and iterating with product and engineering
- Designed high-fidelity wireframes and prototypes within the company design system, clarifying flows and reducing user errors

Spitfiregirl – Freelance Brand & Web Designer | 2017 – 2021

- Launched 5 new client websites, 3 e-commerce stores and 2 brand marketing sites, from brand direction through launch
- Designed conversion-focused layouts in Figma using visual hierarchy, typography, and brand storytelling
- Managed milestones and client communication to deliver brand and digital projects on time

EDUCATION & CERTIFICATIONS

B.A., Design – Western Washington University

Google UX Professional Certificate · Google AI Essentials · NN/g Effective Ideation Techniques
